What is an UnFranchise:

Franchising is based on a marketing concept which can be adopted by an organization as a strategy for business expansion. Where implemented, a franchisor licenses some or all of its know-how, procedures, intellectual property, use of its business model, brand, and rights to sell its branded products and services to a franchisee. In return the franchisee pays certain fees and agrees to comply with certain obligations, typically set out in a franchise agreement.*

The Cost of a Franchise can range from \$10,000 to \$5 Million plus a percentage gross of the business and start ups can range from \$50, \$200,000.

Our **UnFranchises** cost is just \$1 plus 5% of the gross. We are looking for individuals that don't have the upfront money to own a franchise, but see the value in owning one and are willing to do the work to make their business a success by following our proven marketing techniques.
